- release and manifest hashes from R44 evidence: PRESENT

5. Test and release validation

- focused test result: PASS
- exact full-regression counts: 0 failed, 0 errors
- exact full-regression exit status: 0
- canonical seal result: PASS
- release-integrity result: PASS

6. Production activation

- transaction count: 1
- scheduler handoff: 1
- post-health result: PASS
- downtime: 0
- rollback readiness: NO

7. Incident history

- degraded E6 activation
- rollback to legacy
- EB37
- A306
- FDAF
- R9R11 failure
- R9R11R2 state remediation
- R9R12 successful replacement canary
- R9R12R2 owner evidence-gap exception
- R44 and R44R1 safe failures
- final canonical production correction and cutover
